- X-rays

*Transitional Care of Arlington Heights
Post-surgical Care guests achieve the highest level
of functionality quicker, with better outcomes
and with enhanced patient satisfaction.*

The Transitional **Surgical Care Program** offers:

A designated, isolation-free unit

The Transitional Care Post-Surgical care program limits exposure to, and risk of, infection by only admitting patients who are free from infectious disease precautions to the unit.

Physician oversight

Transitional Care of Arlington Heights physicians collaborate with guests' primary care and specialty physicians/surgeons regarding their patient's recovery.

Surgical Care Unit Coordinator

A registered nurse communicates and coordinates with Transitional Care of Arlington Heights physicians as well as patients' surgeons and primary care physicians.

On-site Omnicell/Pyxis medication system

Convenient and immediate medication changes for over 180 medications are available on-site.

Optimal nurse-to-patient staffing ratios and consistent staffing on all shifts

Specially trained post-surgical nurses receive ongoing clinical education.

Specialized post-surgical therapy

Transitional Care of Arlington Heights therapists follow specific surgical care protocols; lymphedema-certified therapists are available as needed.

Specialty Diets

The Transitional Care of Arlington Heights signature Cuisine Care program is available for guests with specialty diets.

Partnering with Hospitals and Physicians for **Accountable Care**

The Transitional Surgical Care Program helps provide accountable care by:

- Reducing hospital re-admissions.
- Enhancing guest satisfaction.
- Reducing cost.
- Improving outcomes.
